Weekly Availability — FreightPilot

Applicant: FreightPilot (Founder)

Program: EAII (The AI Startup Center) — AI Startup Support Program, Second Round

Program duration: 4–6 months, depending on stage

EAII requirement: availability for the entire program, minimum **three days per week**

---

1. Commitment

I commit five days per week (Monday–Friday) for the full duration of the program.

That is **above** the stated three-day minimum. The commitment holds for the entire 4–6 month

program, not only the opening weeks, and it includes both remote sessions and in-person attendance

where the program requires it.

	Days per week	Hours per day	Weekly hours
Committed	**5** (Mon–Fri)	8 (core 09:00–17:00 EAT)	**40**
EAII minimum	3	—	—
Margin above requirement	+2 days		

---

2. Weekly availability grid

All times **East Africa Time (EAT, UTC+3)**. Working hours are 09:00–17:00; the columns below show

what each day is protected for.

Day	Core hours (EAT)	Protected for	Notes
Monday	09:00 – 17:00	Program sessions, mentor meetings, sprint planning	Full day available

Tuesday	09:00 – 17:00	Product engineering, customer discovery calls	Full day available
Wednesday	09:00 – 17:00	Program sessions, workshops, cohort activities	Full day available
Thursday	09:00 – 17:00	Product engineering, operator onboarding, demos	Full day available
Friday	09:00 – 17:00	Program sessions, weekly review, investor/partner calls	Full day available
Saturday	—	Not committed	Available on request for program events
Sunday	—	Rest	—

Flexibility: I can shift the 09:00–17:00 block earlier or later to accommodate program sessions,

mentor time zones, or evening workshops. Given 24 hours' notice I can also make any working day a

full-day commitment to a program activity by moving engineering work to the weekend.

---

3. What I will spend the time on

The program time is not "general availability" — it is allocated against the specific gaps I applied

to close. If accepted, I propose this allocation:

Share of program time	Focus	Concrete deliverable
40%	Customer discovery and design-partner onboarding with Ethiopian logistics operators	First cohort of paying workspaces onboarded onto the live platform
25%	Go-to-market: positioning, pricing validation, channel testing, sales motion	A repeatable onboarding path that does not require the founder per account
20%	Product iteration driven by operator feedback	Prioritised, shipped improvements against the 23-ticket engineering backlog already written

10%	Fundraising readiness — metrics narrative, data room, investor conversations	A seed-ready package
5%	Compliance and the open cashflow verification gate	CBE/Dashen fee-schedule verification closed and recorded

---

4. Constraints I am declaring up front

Stating these now rather than discovering them mid-program:

1. **One founder, no employees.** I am the only full-time person. The five-day commitment is therefore real time, not time shared with a co-founder or a day job. This is an advantage for focus and a risk for single-point dependency — I would use program time to bring on the first hire or contractor.

2. **Travel.** I can attend in-person program sessions and on-site customer visits. Multi-day travel is possible with roughly one week of notice so I can schedule around customer commitments.

3. **One open human verification gate.** Confirming the CBE and Dashen transfer fee schedules (5,000–50,000 ETB band, ±1,000 ETB tolerance) requires a human action that I intend to close during the program. It blocks *paid* launch, not product development.

4. **Production database access.** The live deployment's database credentials need to be reissued before the hosted environment serves signups again. This is a known, scoped operational task, not

a product gap — the full launch funnel is verified working against the same code and schema.

---

5. Contact and response expectations

Channel	Commitment
Program communication (email/messaging)	Response within 24 hours on working days

Scheduled sessions and mentor meetings	100% attendance; 48 hours' notice if a change is unavoidable
Ad-hoc requests from the program team	Same-day where possible, next working day at the latest

---

6. Declaration

> I confirm my availability for the full duration of the AI Startup Support Program at a minimum of
>
> three days per week, and I am committing **five days per week (Monday–Friday)**. I will attend
>
> scheduled program sessions, mentor meetings, and cohort activities throughout the program, and I
>
> will give at least 48 hours' notice of any unavoidable change.
